B6

To the Office of the Geographer,

I, Louis Dachis, am writing to notify you that I do not consider myself solely governed by the government of this country. As the coalition secretary of the nation of Allegra, I am to announce our sovereignty and condemn your government for the immoral acts it has committed in the Persian Gulf and other nation around the world. We can not support these actions. This letter is to announce our neutrality and our disgust in the crimes against humanity that are being perpetrated daily in the Middle East.

Allegra is a peace loving nation and has been organized as a refuge for those who believe that peace and freedom can coexist. Me and the other members of the collective have decided that there are alternatives to the way of life that is dictated to us in the U.S.A... We practice sharing-love and support. We consider all things equal: plants and human beings alike. We do not support a belief in a hierarchical pyramid of life but rather a tangled web of life that connect itself at all levels with everything. We have a constitution much like yours but a vote by all members of the collective is required in order to pass a decision on to the books.

Our wish for the United States is a swift resolution of the conflict that is destroying our planet. We also hope that the damage caused by this situation will bring the world to the realization that we have already come to. We can no longer destroy our planet for economic gain!
